

MEDITERRANEAN CLIMATE CHANGE ADAPTATION AWARDS

A competition designed to promote your actions and encourage stakeholders in the Mediterranean to adapt to climate change

The Mediterranean Basin is a climate change “hot spot” – which means, by the end of this century:

- a rise in average temperatures of 3 to 5°C
- an expected decrease in precipitation of 35% on the southern and eastern shores and of 25% on the northern shore
- a rise in sea level of 20 to 60 cm
(IPCC forecasts, AR5, 2013)

If you are implementing adaptation actions within the Mediterranean bioclimatic zone* in your capacity as a:

- local authority
- national agency
- public university
- NGO in partnership with a local public stakeholder

Promote your actions by submitting an application in one of the three award categories:

- developments, infrastructure and buildings
- ecosystems and natural resources
- methods for designing and implementing public policies

And take advantage of:

- participation in the awards ceremony during COP22 in Marrakech
- international promotion of your actions (press communications, a special publication, etc.)
- an invitation to two international conferences

Applications can be submitted from 25 May to 16 September 2016.

The awards ceremony will take place in November 2016, during COP22 in Marrakech.

Additional information

- The call for applications, the application form and the competition rules can be found on ADEME's website: www.ademe.fr
- For further information on the awards, please contact:
